

# MEDICAL INNOVATION COURSE

JULY  
2017

California Medical Innovation Institute (*CALMI2*, [www.calmi2.org](http://www.calmi2.org)) Education program is a four week project-based course for graduate and post-doctoral students, academic faculty and industry engineers with an interest in entrepreneurship and a commitment to improving health-care around the world through health technology innovation.

The students will be given a certificate in “**Health Technologies Innovation Process**”. To our knowledge, we are not aware of mini-course in the world that takes the students from medical question identification to idea generation, to conceptual design techniques, to building a proof of concept prototype, and to pre-clinical testing.

**3DT HOLDINGS, LLC**

Drugs | Devices | Diagnostics & Therapeutics
